SUMMARY

Senior Frontend Engineer with 13+ years of experience architecting high-performance web and mobile applications across fintech, healthcare, and enterprise retail. Specialized in **React, TypeScript, Next.js, and React Native** ecosystems, with deep focus on design systems, micro-frontends, and AI-assisted development workflows. Proven track record of **driving measurable conversion impact**, unblocking deployment pipelines, and shipping accessible products end-to-end.

KEY ACHIEVEMENTS

Measurable Revenue & Growth · Gen Digital · Shipped performance-optimized UI variants that **boosted widget engagement by 105%** and drove a **$54k/week revenue** lift.

Zero-Wait Deployment Pipeline · MZ Group · Architected **micro-frontend** migration (Module Federation), slashing complex release approval cycles from 7+ days to **zero**.

Enterprise Scale Mobility · Luizalabs (Magalu) · Engineered 5+ React Native apps deployed across 1,000+ retail stores with offline-first synchronization.

EXPERIENCE

Gen Digital

NEW YORK, UNITED STATES (REMOTE)
AUG 2024 - JUN 2026

Senior Frontend Engineer

- Optimized the primary "instant-access loan" conversion funnel by engineering and testing multiple UI variants, resulting in a 105% increase in widget engagement and a 32% lift in lead generation, driving a $54k increase in weekly revenue.
- Engineered cross-platform mobile features in React Native for personal finance management, optimizing user navigation, state handling, and backend REST API integrations.
- Collaborated with the Consumer Marketing team to transition the core blog from WordPress to a modern Next.js architecture, improving Core Web Vitals and load times.
- Developed high-performance web pages for viral global marketing initiatives (including a campaign with creator MrBeast), optimizing assets to sustain high-concurrency traffic.

Afya

RIO DE JANEIRO, BRAZIL (REMOTE)
JUN 2023 - APR 2024

Senior Frontend Engineer

- Architected and launched WB Expert, a Progressive Web App (PWA) built with Next.js and TypeScript to distribute specialized medical guidelines and clinical directives.
- Implemented end-to-end user telemetry and event tracking pipelines using Snowplow and Braze, powering data-driven decision-making for medical educational content and courses.
- Engineered a high-performance content delivery architecture capable of indexing and serving 5,000+ medical articles with low latency and zero layout shift.

Lend

SÃO PAULO, BRAZIL (REMOTE)
JUL 2022 - FEB 2023

Senior Frontend Engineer

- Engineered the frontend interface for an automated loan approval web app using Next.js and TypeScript, streamlining credit application flows for business and retail users.
- Refactored the core frontend codebase to improve TypeScript type safety, eliminate duplicated logic, and standardize API data fetching patterns with React Query.
- Built and launched the company's marketing website from scratch in 48 hours using Next.js and TailwindCSS to support initial customer acquisition.

MZ Group

Senior Frontend Engineer

SÃO PAULO, BRAZIL (REMOTE)
OCT 2020 - JUN 2022

- Architected the migration from a monolithic platform to a micro-frontend architecture using Webpack Module Federation, structuring decoupled CI/CD pipelines that reduced release approval cycles from 7+ days to zero.
- Engineered an executive investor relations dashboard using React and Airbnb's visx, consolidating distributed financial metrics and stock market data into unified real-time visualizations.

Luizalabs (Magalu)

Frontend Engineer

FRANCA, BRAZIL (ON-SITE)
AUG 2017 - AUG 2020

- Engineered 5+ React Native mobile applications focused on store logistics, deployed via MDM across 1,000+ physical retail stores with offline-first local synchronization.
- Developed mobile inspection tools for Magalu's reverse logistics operations, enabling warehouse teams to classify product damage grades and streamline inventory intake.
- Collaborated with data engineering squads to write Python data extraction scripts, assisting in the migration of operational store metrics into the centralized data warehouse.

SMN TI

Frontend Engineer

FRANCA, BRAZIL (ON-SITE)
AUG 2013 - AUG 2017

- Architected the frontend for the company's flagship real estate ERP, building the original AngularJS UI component library, later ported to Angular 2+ and released as open source.
- Built an enterprise supply billing tracking web application for retail client Magalu using AngularJS, enforcing strict modular architectural patterns and code standards.
- Engineered the frontend for an internal workforce management web app to track developer hours, leave requests, and performance evaluations, leading a squad of 6.
- Served as the founding frontend engineer, establishing foundational development standards and modern build tooling while mentoring a team of 5 junior developers and interns.

SKILLS

Languages & Core: TypeScript · JavaScript · HTML5 · CSS3/SASS · Python (scripting)

Frontend & State: React.js · Next.js · React Native · React Query · Redux (Saga/Thunk) · Valtio · Recoil

UI, Styling & Design Systems: TailwindCSS · Styled Components · Storybook · Reshaped · Material UI · Airbnb visx

Testing, Tooling & AI: Jest · React Testing Library · Cypress · Webpack (Module Federation) · Chromatic · Cursor · Claude Code

Cloud, DevOps & Observability: AWS · Google Cloud Platform · Vercel · Cloudflare · Datadog · Sentry · Snowplow · Growthbook · Harness.io

EDUCATION

FIAP

Associate Degree in Systems Analysis and Development

SÃO PAULO, BRAZIL
JAN 2017 - DEC 2018

ETEC Dr. Júlio Cardoso

Technical Diploma in Information Technology

FRANCA, BRAZIL
JAN 2012 - JUL 2013

CERTIFICATIONS

Microsoft Certified Professional (MCP): Programming in HTML5 with JavaScript and CSS3 · Issued Feb 2015

LANGUAGES

English: Advanced / Full Professional Proficiency · **Portuguese:** Native
